1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ono et al in view of Blanchard. Ono et al disclose the basic claimed structure including a water jet propeller apparatus with a stator defining a channel 22 therein, an impeller 26, a collar 21 with a seal and an impeller shaft 13. Not disclosed by Ono et al is the impeller shaft being threadably connected to the impeller. Blanchard teaches a threadable connection 32. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the device of Ono et al to have a threadable connection as taught by Blanchard for improved strength.

3. Claims 1-16 and 18-20 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Freitag et al show a bearing.
